

OHenry Tent Tops and walls are American made. We do not import Tops or walls from overseas. We build our own, right here in Waco, Texas.

## OHENRY TENT MATERIAL SPECIFICATIONS

## Approved vendor to the U.S. Army, Air Force & FEMA!

- Ohenry tents are built for commercial, and industrial use. We build all our tents to endure multiple set ups and takedowns. Ohenry tents are specifically designed to endure the daily abuse of a rental environment. For 25 years we had a tent rental division, and we know by experience the abuse a rental tent can be subjected to.
- All Ohenry tents are constructed with 100% American made products when possible. We refuse to use inferior and less expensive tent material, rope, webbings or hardware. A tent using inferior components will cost 60% less to manufacture, but simply will not last.
  - Please examine closely the perimeter "edge work" as well as the lace lines, corner fittings, center pole fittings and side pole fittings of any tent you are contemplating for purchase, regardless of the manufacturer. These are the areas where shortcuts are made to reduce cost of manufacturing. However, these are the most critical areas of tent construction, and any shortcuts made here will simply guarantee that the tent will not last as it should!
- When you buy an Ohenry tent, you know the fabric is first run (no seconds) quality material. Our side walls are also constructed of 13 - 14 oz material. We do not use the inferior 10 oz material common to many manufacturers.
